

Duralast 4203 Solving 21st Century Sealing Problems!

Material Properties

- Suitable for use in **High Water Based** Fire Resistant Fluids!
- Suitable for Large Range of Biodegradable Hydraulic Fluids!
- Stability in Water up to 195 °F
- High Ozone/Weather/Temperature resistance!
- Extremely Low Compression set makes it ideal of High Loading Applications!
- Extremely Resistant to new grades of fluid additives!
- Low Gas Permeability!
- Excellent Sliding Properties!
- Excellent Abrasion Resistance!
- Excellent Radiation Resistance!

Types of Seals Available

- U-Cups
- Composite Seals
- High Pressure Piston Seals
- T-Seals
- Compact Piston Seals
- 'O'-Rings and Octi-Rings
- High Speed Rotary Seals
- Contoured Back Ups
- Wipers and Excluders

Application Areas

- Longwall Mining Shields
- High Speed Presses
- Piston Accumulators
- Nuclear Power Plant Manipulators
- Tropical Environments
- Oilfield Production Equipment
- Tunneling and Boring Equipment

#0703

Another Cutting Edge Design from American High Performance Seals, Inc.
