

OCTI-RING "O"-RINGS

THIS SPECIAL "O"-RING WAS SPECIFICALLY DESIGNED TO ELIMINATE THE PROBLEMS USUALLY ASSOCIATED WITH "O"-RINGS

- Can be retrofitted into existing grooves instead of re-machining to accommodate a U-Cup.
- Specially designed chamfers eliminate nibbling in pressure cycling application.
- Available to meet temperatures from -40°F to +400°F.
- Some designs able to withstand 5,000 p.s.i. without the need for a backup ring.
- Elimination of rolling and twisting in the groove.
- Less likely to be damaged during equipment assembly, especially with long rods or bores.
- Special grades available for water hydraulics.
